CHENGSHAN

Strong Tire For Longer Performance

The CDR606 drive axle tyre is the new On-Road range predominantly for Regional haul, delivering top-class mileage, enhanced durability and retreadability and very good all-season capability throughout the full tyre life. With its exceptional mileage potential, the CDR606 is also an excellence choice for long haul use on the drive axle.

The CDR606 delivers excellent traction on dry, wet and snowy roads. Its special casing protection ensures high damage resistance.

1 = Fuel Efficiency 2 = Wet grip scale 3 = External rolling noise

1 Optimized directional pattern with high density and increased depth of specially designed sipes and grooves.

+ Maximum effectiveness of biting edges up to end of tyre life, interlocking with the road surfaces.

✓ Increased and optimized traction and high mileage

3 Large shoulder grooves and a clever stone ejection design effectively removes stones and gives the tyre excellent wear resistance, plus anti-puncture and self-cleaning performance.

+ Openings in the shoulder ribs create biting edges for increased traction and effectively evacuate water and mud. Grooves open under torque, releasing trapped stones and avoiding drilling into the casing.

✓ High traction throughout complete tyre life. Improved tyre and casing protection and durability.

4 Optimized casing shape.

+ Provides a constant and regular footprint in a wide range of load conditions throughout the tyre's life.

✓ Even tread wear over the full tyre life, especially in the shoulders, providing excellent mileage.

2 Cool running/highly abrasion-resistant tread compound. Dual tread compound, combining two layers of different rubber.

+ The top compound provides high abrasion resistance. The base compound offers low rolling resistance combined with excellent tread wear performance.

✓ Dual tread compound for higher fuel efficiency without compromising on mileage performance.

The CDR606 tyre series is TÜV SÜD certified for wet performance, high speed durability, noise and rolling resistance.

Designed for performance in severe snow and cold weather conditions.
